

COPE ENVIRONMENTAL CENTER

Summer Adventure Programs

2012 Registration

Registration begins March 1st. Members of CEC are able to sign up February 1st! Space is limited, but registration is open until the classes are full. Call CEC at 765-855-3188 to request a registration form (temporarily reserves your child's spot in the class). Reservation forms must be returned with program fee within two weeks of receiving the form to secure your child's spot in the program.

Program Fees

The program fee for each five day program of three hours is \$70 for members and \$80 for non-members. Conservation Camp and Eco Camp fees are \$140 for members and \$160 for non-members. Lunch Bunch programs are an additional \$12.00 for the whole week.

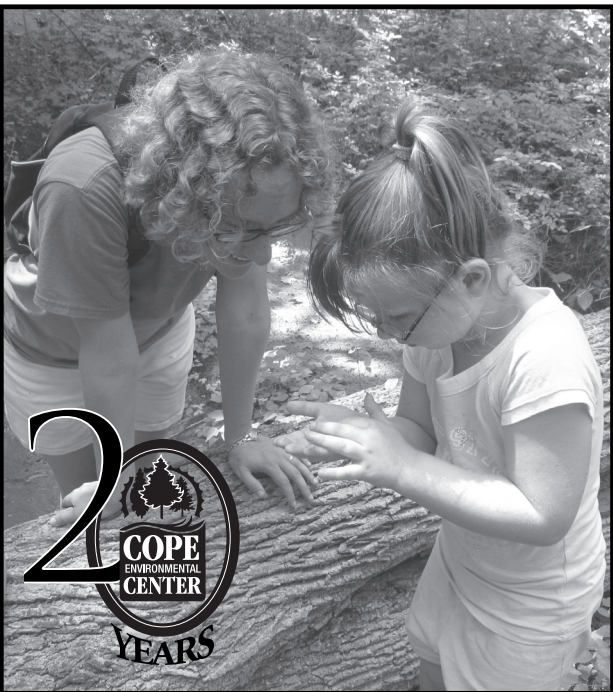

Scholarships

Camp scholarships are limited and need-based. Please call 765-855-3188 for more information.

Lunch Bunch

Lunch Bunch is available if your child is enrolled in back to back programs (am & pm sessions). It is \$12 for the week and requires your camper to bring his/her lunch in a reusable container to limit trash. It is supervised time to eat and play.

If your child brings his/her lunch to camp, please work with your child to pack a lunch that is as "trash-free" as possible!

PreK-Kindergarten

Sense Safari

June 4-8; 9am-12pm or 1pm-4pm

Every day will be a new adventure! We will learn to use all of our five senses and discover all that awaits us in our environment. We will take hikes, play games, read wonderful stories, and use our imagination to explore the world around us!

Bugs & Slugs

June 25-29; 9am-12pm or 1pm-4pm

Why are slugs so slimy? What insect can lift 100 times its own body weight? Who is the largest bug in the whole world? Join us for this slug-ific program and we will find out all of the answers! We will crawl, run and jump our way through CEC's grounds searching for fun slugs and buzzing insects.

It's Easy Being Green...or Blue or Red or Yellow

July 30-August 3; 9am-12pm

The forest is filled with many beautiful colors that we are going to find and admire! Our fun color projects include painting with items from nature, tie-dying bandanas and experiment with mixing colors. We will also make colorful, healthy treats each day!

Grades 1st-3rd

Wade Into Wetlands

June 11-15; 9am-12pm

Do you like to explore wild places? Do you like the thought of finding critters that look like visitors from another planet? You won't want to miss this program! We will dig deep to explore the wonders of the wetlands- from critters to plants, from top to bottom. You will get muddy!

Let's Hear It For Herps!

June 11-15; 1pm-4pm

Explore the incredible world of herpetology (the study of reptiles and amphibians). What is the difference between the two? What do they eat? Where do they live? Become a snake or a turtle, and crawl into their world to find out!

EcoCamp

July 9-13; 9am-3pm

This year Eco Camp will be filled with new outdoor adventures! Together we will explore all the nooks and crannies of CEC. There will be games, scavenger hunts, experiments, and a whole lot more. Be sure to pack a lunch with a beverage daily.

Outdoor Fun

July 23-27; 9am-12pm

The name says it all! We will have fun in the sun all week long. There will be water play, hiking, games, fishing, searching for animals and many other exciting activities to explore our outdoor world. The last day of the week will be planned by the campers! They will vote on various activities from previous days or years and create new activities together.

Inspect That Insect

July 23-27; 1pm-4pm

Become an entomologist! We will learn the basics to identifying insects and how to safely catch and study them. Mounting insects for display is something scientists do, and we will too! We will also take part in an Insect Olympics and open an "Insect Diner" for all to try!

Grades 4th-6th

Conservation Camp

June 18-22; 9am-3pm

Conservation Camp will offer the perfect mix of new activities and a few "oldies but goodies". We will learn about wild edibles, orienteering and more. The optional Thursday night campout is certain to finish the week with a bang! Please provide a sack lunch and beverage for Monday-Thursday. Dinner and breakfast for the overnight will be a collaborative effort between campers and CEC.

Mad Scientists

July 16-20; 9am-12pm

This is for all of you who love to mix up wild concoctions. We will mix, stir, shake, rattle, and roll. Learn how to write secret messages with things in your own kitchen, make soda pop, and other smelly, fun science experiments your parents won't let you do in their kitchen!

CSI: Critter Scene Investigation

July 16-20; 1pm-4pm

We all love a good mystery...come and investigate our "crime scenes"! We will learn about the tricks investigators use to solve mysteries and relate those practices to nature. Studying finger prints (or paw prints!), soils, and different types of fur/feathers will help us get closer to solving our mysteries.
